## GOLD DOLLARS.

This series of the United States coins appears to have special and increasing interest to the collector; they are, however, steadily advancing in price, and rapidly passing beyond reach to the melting pot, or mutilation. Only about 13 dates, out of the 41 different years they were struck, are readily obtainable, while those with mint marks other than O for New Orleans, are very rarely met with; months and even years roll by, without additions to the number known of some of them; therefore the series possesses more than common interest.
